## METHOD AND APPARATUS FOR IMPLEMENTING AUTONOMOUS VARIATION OF MEDIA DISMOUNT TIME IN A ROBOTIC MEDIA LIBRARY

## Abstract of the Disclosure

5

10

A method, apparatus and computer program product are provided for implementing autonomous variation of media dismount time in a robotic media library. I/O requests to the robotic media library are monitored. Performance statistics are gathered for the I/O requests to the robotic media library. The gathered performance statistics are periodically checked to determine if a change is needed for the media dismount time. The gathered performance statistics include a media hit count of where a data storage medium (DSM) for an I/O request is in a robotic media drive, and a media near miss count where the DSM for the I/O request is in transit from the robotic media drive.
